HOT PANELS

DECOR | GATES | PERFORATED

Decorative panels are a great way to add the finishing touch to your yard or fence line and can be used in so many different ways. Shade screens on a pergola, enclosures for bins, pool pumps or gas bottles, or a backdrop to a garden bed.

A huge range of quality Dulux powder coat colours and customised designs will perfectly compliment your own style. Materials including Aluminium, Corten Steel and Aluminium Composite Panel are available with single panels in either landscape or portrait, and multiple panels to cover larger areas.

HOT PANELS

DECOR | GATES | PERFORATED

Pick from one of our existing designs, or we can create something unique that fits your theme perfectly. Our designs can be covered into a perforated style to meet fencing regulations for use around pools or daycare centres. We can even make perforated screens from photographs so you can turn your fenceline into a mural.

We can cover almost any distance as well with in-house fabricated framing and designs that can either repeat across or flow along with every panel being unique.
